

Car Window Interface Wireframe Sketch.

Using a car window has a interface screen where it is interactive and uses VR-like effects to show news articles, navigation, caution, ads or no ads, etc.

HOME SCREEN

Normal car window screen. On the bottom it looks like an apple ipad or iphone where there are apps etc.

NOTIFICATION OF NEWS ARTICLE.

In an ideal setting, the car would have auto drive for the driver to be able to do different tasks while in the car (check emails, watch movies, read news, read email etc.).

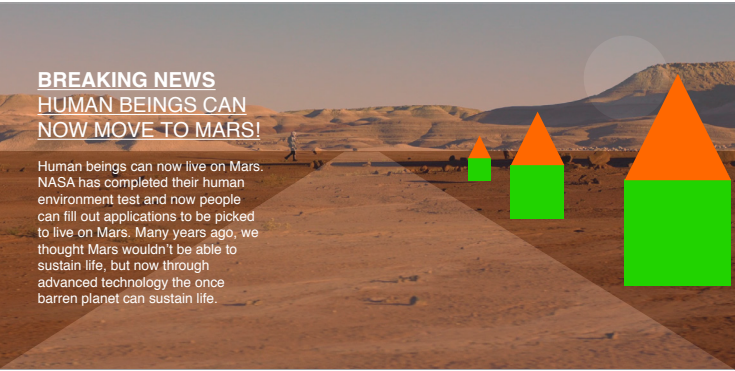

Much like VR. The screen will act as an virtual reality like screen and give the driver and passengers a taste of what it would look like driving through Mars.

NEWS ARTICLE PAGE EX.2

Much like VR. The screen will act as an virtual reality like screen and give the driver and passengers a taste of what it would look like driving through Mars.

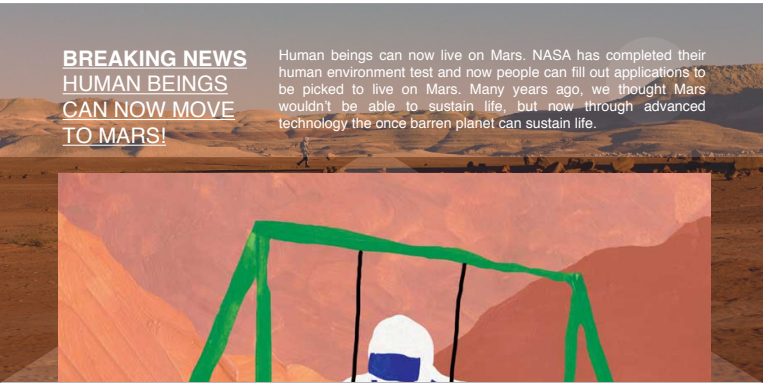

NEWS ARTICLE PAGE EX.3

Much like VR. The screen will act as an virtual reality like screen and give the driver and passengers a taste of what it would look like driving through Mars.

NEWS ARTICLE PAGE EX.4

Much like VR. The screen will act as an virtual reality like screen and give the driver and passengers a taste of what it would look like driving through Mars.

NEWS ARTICLE PAGE EX.5

shows diagrams of what kind of houses are going to be built and talks about how nasa as helped make Mars a habitable environment.
