We Landed!

Explore how we landed on Mars

After years of exploration, technology has finally allowed humans to walk on another planet.

New Mars space shuttle

SpaceX, the aerospace company led by Elon Musk, has been working with NASA scientists to locate possible landing sites on Mars for years. Paul Wooster, who manages the guidance, navigation, and control systems on SpaceX's Dragon spacecraft, said during a presentation at MicroSymposium 58 last year that the landing sites were for both its Red Dragon spacecraft as well as future human missions.
